

"Babies are miracles. Think about it. When they're born their feet are tiny. Yet, they can somehow step on all your hopes and dreams."

This is more of an AutoBio than a Bio. The truth is most comedians write their own bios. I'm not judging. It's a lot easier to brag about one's own accomplishments while hiding behind third person. They are very well written. It seems comedians either 1. Have a Masters in English, or 2. A Thesaurus, and a lot of free time. I have neither.

The truth is I'd rather you come see me to check it out for yourself. To get you to the club I'll tell you this.
